Data Risk Assessment

Category	Score	Legal Risk of License and Privacy	
A-1	4.9	Risk Free	자체서비스, Public Cloud에서 AI Model 서비스 등 Public하게 공개되어도 원저작자나 Licensor, 정보주체, 유관기관으로부터 Data와 관련한 분쟁의 가능성이 없음
A-2	4.6	Low	License / 개인정보 이슈가 존재하여 침해의 가능성이 약간 존재 가능하나 소송이나 중재 등 분쟁 또는 유관기관의 처분 등으로 심화된 알려진 Case 없음
A-3	4.2	Low	License / 개인정보 이슈가 존재하여 침해의 가능성이 상당히 존재 가능하나 소송이나 중재 등 분쟁 또는 유관기관의 처분 등으로 심화된 알려진 Case 없음
B-1	3.7	Medium	License / 개인정보 이슈가 존재하여 침해의 가능성이 높으며, 소송이나 중재 등 분쟁 또는 유관기관의 처분 등이 발생한 Case가 존재하고, 당사도 분쟁에 휘말릴 가능성 다소 존재
B-2	3.5	Medium	License / 개인정보 이슈가 존재하여 침해의 가능성이 높으며, 소송이나 중재 등 분쟁 또는 유관기관의 처분 등이 발생한 Case가 수 건 있고, 당사도 분쟁에 휘말릴 가능성 다소 존재
C-1	3.1	High	License / 개인정보 이슈가 존재하여 침해의 가능성이 크게 높으며, 소송이나 중재 등 분쟁 또는 유관기관의 처분 등이 발생한 Case가 상당히 있고, 당사도 분쟁에 휘말릴 가능성 존재
C-2	-	High	License / 개인정보 이슈가 존재하여 침해의 가능성이 크게 높으며, 거액의 소송이나 중재 등 분쟁 또는 유관기관의 처분 등이 발생한 Case가 있고, 당사도 분쟁에 휘말릴 가능성 크게 존재

Data Risk Assessment

Model Risk Assessment

Grade C-2 (Score : 2.9)

Legal Risk

High potential for infringement due to licensing and privacy issues, with precedents of significant litigation, arbitration, or regulatory actions, and significant risk of our company becoming involved in disputes.

Usage Reference Standard

Not recommended for use

(if absolutely necessary, temporary use only for internal research purposes.)

Key Data Characteristics

Open Crawling Data

B-2 class is evaluated at 85.8%, where B-2 class is data suitable for internal use.

If C-2 class data is deleted, AI Model Risk Assessment score is expected to improve and Risk Class is expected to upgrade to B-2.

How to Secure the Supply Chain?

1

The Hardware Era

Bill of Materials

Manufacturing supply chain transparency
+
Traceability of product components

2

The Software Era

Software Bill of Materials

Software supply chain transparency
+
Traceability of dependencies and licenses

3

The AI Era

AI Bill of Materials

How do we trace the transparency of AI?

How can we guarantee the transparency of AI, a black box? Can today's SBOM tools open that box?

Transparency Lies within Connection

1

Model Provenance

- ✓ Was the model built from scratch?
- ✓ Or was it fine-tuned or derived from, a pretrained foundation model?

2

Training Data Lineage

- ✓ Exactly which datasets were used for training?

3

Dataset Provenance

- ✓ Where did this data originate, and was it lawfully obtained?

We Define the Missing Link

What the field shows

Information carried on each edge: origin · license · acquisition method · purpose of use

We have translated one nation's legal obligation into the language of an international standard.
Korea is taking the first step toward trust that crosses borders.

K-AI BOM Travels Along the Supply Chain

K-AI BOM

Lineage · provenance · role · constraints are carried through every hand the model passes through.

Dataset

Declares its own provenance and lineage.

AI Model

Inherits it and adds its own record.

Service

Delivers the model together with its record.

User

Can verify what they are actually using.

Different Interests, But on the Same Ground

The four parties want different things. But now each can judge for themselves on the same record, and decide on a common foundation.

One Record, Different Decisions

No one has to accept anyone else's judgment. Seeing the same thing, and then deciding for yourself – that is enough.

LG AI Research is not merely a supplier of technology. We, too, are a participant in the supply chain.

Advancing AI for a better Life

LG AI Research

감사합니다.
